PANTONE:

These colors represent our most commonly stocked thread colors; although we have many other colors available, we cannot list every color online. Please note variations in monitor settings, calibration, and resolution can greatly distort the actual colors represented; mobile devices often distort the colors significantly. For the most accurate comparison, viewing should be matched to the Pantone color under color correct lighting. Custom thread colors may require ordering thread that will result in additional charges. As part of our proofing process, you will receive a photo or actual sew-out of your logo on a material that represents the color of your items to be embroidered on all newly digitized logos. Feel free to talk to us about your logo thread colors!
